and the

Present the

Industrial Engineering Graduate Research Symposium

November 5, 2010

STEW 218a-c

8 a.m. to 12 p.m.

Industrial Engineering students and faculty will be presenting recent research.

Keynote presentations by newly honored Outstanding Industrial Engineers Erin T. Youngs and Craig T. Hall

Refreshments with the entire 2010 class of Outstanding Industrial Engineers following the symposium

8 a.m.

Erin T. Youngs, VP of Finance
Walt Disney Parks and Resorts

“IEs at Walt Disney”

For the past 20 years at Disney, Youngs cultivated a reputation for helping leaders manage their career development. She has held roles in business planning and development, industrial engineering, and organization improvement. Her work has supported the varied business units across Walt Disney World.

Youngs earned a bachelor's degree in industrial engineering with a minor in fine arts from Purdue in 1992. She earned her master's degree in business administration from Rollins College in 1999.

11:15 a.m.

Craig T. Hall, President
Lee Shore Enterprises Ltd.

“Entrepreneurialism and its impact and importance on research”

Hall has more than 35 years of experience in logistics and information service management. An early innovator, Hall started eight successful supply chain and related technology companies, including ISG and Total Logistic Control. Following those, Hall founded LeanLogistics, Inc. an Internet-based, on-demand transportation system in a true Software-as-a-Service environment. Hall was honored as one of the Top 20 logistics professionals in the country.

Hall earned his BSIE from Purdue in 1972.

Think *impact.*
